

Ground Link

Ground Communications Outlet Arnold Palmer Reg. Airport 121.8

To contact Clearance Delivery or FSS Wx Brief by *Voice Activation* or *Quick Click* while on the ground to *obtain* or *cancel* an IFR Flight Plan:

- To contact Johnstown Approach, click the mic 2 times.
- To contact Cleveland Center, click the mic 4 times.
- To contact FSS Wx Brief, click the mic 6 times.

The system will ask you to click the mic twice if it is dialing the correct location. If it is not correct, wait 5 seconds and start again.

The GCO will then dial the appropriate number. You will hear it dialing. When the briefer answers just communicate your needs via the radio - telephone link.

HINTS

If there is no voice activity over the system for 60 seconds (told to standby, etc.), it will say "Timing Out", key the mic within 3 seconds and that will get an extra 30 second of "no voice time".

If the system does not respond at first, try repositioning your aircraft for a clear path to the antenna at the terminal building.

To terminate the call, click the mic 3 times while the frequency is clear and the call will be terminated. Wait 2 seconds and start again.
